Imaging Department

07/12/1999

CERVICAL SPINE: AP AND LATERAL VIEWS

REASON FOR EXAM: S/P ACF C4 C5

RESULT: Comparison is made with the previous examination done on 4/5/99.

There is anterior fusion with the bone plug seen at C4-5 disc level. The bony density anterior to the C4-5 disc level now appears to be contiguous with the bone plug. This density however still protrudes about 4 mm anterior to the vertebral bodies. There is otherwise satisfactory alignment of the C4 and C5 vertebral bodies.

IMPRESSION: Bone plug at C4-5 with anterior protrusion of a bony density at the C4-5 disc level.

Howard K. Arimoto, M.D.
 (interpreting physician)

Donn Y. Kumasaki, M.D.
 (signing physician)
